KIM, PETER B

ART UNIT PAPER NUMBER

2851

DATE MAILED: 08/28/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/762,569

Applicant(s)

BUTLER, HANS

Examiner

Peter B. Kim

Art Unit

2851

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 and 21-28 is/are pending in the application.
- 4a) Of the above claim(s) 11-20 and 29-36 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 9, 10, 21-23 and 25-28 is/are rejected.
- 7) ☒ Claim(s) 6-8 and 24 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 10 May 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Aug. 14, 2006 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 21, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi et al. (Kobayashi) (5,936,792).

Kobayashi discloses a method of controlling a position of a mass and a control system that controls a position of a mass by applying a control force to said mass in accordance with a desired mass acceleration, said control system comprising: a first input (Fig. 1, ty) that receives a signal based on a desired position of said mass (col. 10, lines 13-25); a second input (Fig. 1, y(k)) that receives a feedback signal indicative of an actual position of said mass (col. 19, lines 13-25); a comparator unit (3) configured to determine a signal indicative of a difference between said desired mass position and said actual mass position (col. 10, lines 13-25); a control unit (14) configured to produce a signal indicative of said control force based on said difference between

Art Unit: 2851

said desired mass position and said actual mass position (Fig. 1, control input); an estimator unit (5, 6, 9) configured to calculate an estimated relation between said control force and status information of said mass, said status information comprising an indication of at least one of a position of said mass, a velocity of said mass, and an acceleration of said mass (col. 10, lines 16-36, col. 10, line 50 – col. 11, line 26); and a third input (12) that receives a feed-forward signal indicative of said desired mass acceleration, wherein said control system determines said control force based on said estimated relation and said desired mass acceleration (col. 10, lines 26-50, col. 10, line 50 – col. 11, line 26).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 22, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. (Kobayashi) in view of Kurosawa (2002/0145716).

Kobayashi discloses the claimed invention as discussed above; however, Kobayashi does not disclose estimator that uses a least-square method. Kurosawa discloses using the least-square method. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the least-square method of Kurosawa to the invention of Kobayashi in order to prevent sync error as taught by Kurosawa in para 0059.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. (Kobayashi) in view of Kurosawa as applied to claim 3 above, and further in view of Cutler (20010029674).

The further difference between the claimed invention and the modified Kobayashi is removing an offset of the control force by using a filter. Cutler discloses using a high-pass filter in para 0038. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the high pass filter of Cutler to the invention of Kobayashi in order to keep the mass stable as taught by Cutler in para 0038.

Claims 9, 10, 27 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. (Kobayashi) in view of Cutler.

Kobayashi discloses the claimed invention as discussed above; however Kobayashi does not disclose using a filter. Cutler discloses using a high-pass filter in para 0038. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the high pass filter of Cutler to the invention of Kobayashi in order to keep the mass stable as taught by Cutler in para 0038.

Allowable Subject Matter

Claims 6-8 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art of record teaches or discloses the estimator unit as claimed in claims 6 and 24 in combination with the control system of claim 1 and the method of claim 21.

Response to Arguments

In response to applicant's arguments Korenaga and Takashi references are withdrawn.

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter B. Kim whose telephone number is (571) 272-2120. The examiner can normally be reached on 8:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diane Lee can be reached on (571) 272-2399. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
